Cablesafe Safety™ Hooks

FRP Engineering is proud to be the Australian Distributor of the world renowned Cablesafe™ hooks. Manufactured in Europe, using the best quality resin, Cablesafe™ hooks are the best and most durable option

for temporary cable maintenance Cablesafe™ hooks are such a simple idea that have a massive effect on Safety and when applied in maintenance, shutdowns, and construction works. Primarily designed as a safety product to suspend hoses, cables and work gear off the work floor, Cablesafe™ hooks have proved themselves to be infinitely more useful as users find unique ways to utilise their simplicity and durability.

With 4 different sizes available and load capacity up to 300kg, the Cablesafe™ safety hooks offer unsurpassed versatility. Cablesafe™ safety hooks are not only used for the suspension of cables and hoses, they can also be used for the safe storage of hose, cables, lifting gear and many other items to get them out of harms way.

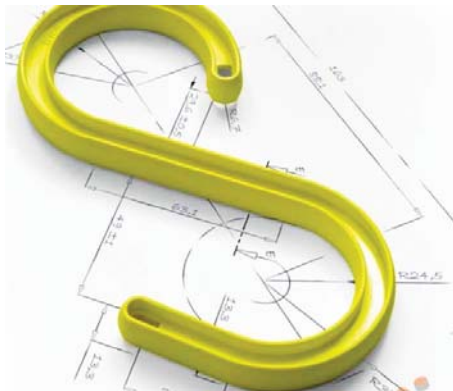

Cablesafe™ safety hooks are able to be “branded” with your company name and colours for easy identification on sites.

“Such a simple and cost effective idea that allows us to comply with site OH&S requirements.

We can even take them with us to the next job..”

Dave Guest
