

# MINI MESH

Superior Safety, Durability, and Performance in Every Step

**Minimesh FRP grating** combines all the benefits of standard FRP moulded grating, offering a versatile, functional, and cost-effective alternative to traditional materials.

Available with smooth, meniscus, or gritted anti-slip surfaces, Minimesh grating provides excellent slip resistance in wet, oily, and icy conditions. It has been tested to meet various Australian and international standards, ensuring long-lasting durability. The gritted anti-slip surface protects against heavy wear and is an ideal replacement for timber, steel, or aluminium.

With a smaller aperture size than standard FRP grating, Minimesh complies with BCA disability code AS1428-2001 and public access requirements. This smaller aperture also reduces the risk of small tools or objects falling through, improving safety.

## APPLICATIONS

- Jetties
- Docks
- Waterparks
- Marinas
- Walkways
- Public access areas
- Commercial kitchens
- Access ramps
- Sheep & shearing sheds
